Alpacas are easy on the environment.
 Gentle grazers *lower pasture requirements*
 Efficient feed converters *low protein requirement*
 Soft padded feet *low impact on fragile ground*

Alpaca is easy to wear & enjoy.
 Light and warm *microscopic air pockets*
 Soft and silky feel *smooth fibre structure*
 Hypoallergenic *no lanolin to catch dirt & allergens*
 Huge range natural colours *plus ability to dye*

Support industry development
 Contribute to marketing initiatives, important research, herd health and genetic advancement programs.
Utilise the International Alpaca Registry (IAR)
 Enjoy the knowledge, security and marketing power of this respected pedigree database.

Alpacas offer exciting business opportunities.
Animals and stud services
 Alpaca ownership and farming is rapidly gaining international popularity since the original exports from South America. Australian genetics are now highly sought after around the world.
Fleece and products
 Whether you have 10 alpacas or 10,000 there is a range of options to sell your fleece or process your clip into tops, yarn, garments and homewares for local and international customers.
Meat and hides
 The commercial farming of alpaca now includes the meat and hide industry providing the grower with an additional income stream and improving the viability of the industry as a whole.

Alpacas are easy to breed and manage.
 Easy to handle and responsive to training
 Minimal husbandry and disease risk
 Easy on fences & use communal dung piles
 Generally unassisted births in daylight hours
 Do not have to be mated 'in season'
 No tail docking! No mulesing! No flystrike!
